Bio TDB-100, Dry block thermostat

Bio TDB-100 is a compact easy-to-use dry-block thermostat designed for long incubation processes at various temperatures. The universal aluminium block can accommodate 3 most popular Eppendorf tube types.

Simultaneous indication of set and actual temperature and time.

Specifications:

Temperature control range	5°C above ambient ... +100°C
Temperature setting range	+25°C to +100°C
Setting resolution	0.1°C
Stability	±0.1°C
Uniformity (at +37°C)	±0.1°C
Digital timer with sound alarm	1 min–96 hrs
Display	LCD, 2 x 16 signs
Block diameter / depth	Ø 130 mm / 45 mm
Block capacity	24×2/1.5 ml + 15×0.5 ml + 10×0.2 ml microtubes
Overall dimensions	210×230×110 mm
Weight, not more	3.1 kg
Power supply	220/240 V, 50/60 Hz
Heating power	200 W

Catalogue number:

Bio TDB-100 BS-010412-AAA

Different block types can be produced on request.
